(GD and PI)
(By Meenakshi Rana & P. Singh)

AV → Roses are Sweet

→ Sweetness is associated ~~to~~ with Roses

→ Sweetness is attributed to Roses

→ Sweetness is a characteristic of Roses

AV → Pass me the Salt

PV → you are requested to pass me the Salt

Equations containing only algebraic functions are called as algebraic Equation

$$x^2 - 2x + 1 = 0$$

$$x^3 - x + 1 = 0,$$

$$x^2 - \sqrt{x} + 5 = 0$$

Transcendental function Equation

Equation containing transcendental functions only are called as Transcendental Equation

eg $\rightarrow \sin x - x = 0, \quad e^{2x} - x^2 + 5 = 0$

Usually we can find the solution of an equation $f(x) = 0$ by using factorization (direct method) but it's not possible in every case.

In that case we have to use indirect method.
