

iii) List

It is a comma separated sequence of values enclosed with a pair of `[]`

Ex `L = [5, 4, 3, 6, 7, 9]`

`L = []`

`L = [5, "AB", [7, 9, 8]]`

→ Elements are indexed base on their position

→ Accessing element of list

`L = [2, 5, 7, 9, 12, 15]`

for `n in L:`

`print(n)`

`print(n, end=" - ")`

Boolean datatypes:-

→ It represent two in build values (True, false)

→ Represented by class 'bool'

`a = True`

`print(type(a))`

`<class 'bool'>`
