

loop else:-

It is executed when a loop is normally terminated.

Example:-

```
n = int(input("Enter a number:"))  
for i in range(2, n//2 + 1):  
    if n % i == 0:  
        print("it is not a prime number")  
        break
```

else:

```
    print("it is a prime number")
```

Nested loop:- ~~a~~ Loop within a loop

```
for student in range(60):  
    s = 0  
    for i in range(10):  
        m = float(input("enter marks:"))  
        s += m  
    avg = s / 10  
    print("Average = ", avg)
```
