

```
class Main {
```

```
    public static void main(String args[]) {  
        printName();  
    }
```

```
    public static void printName() {  
        System.out.println("Aditya Sharma");  
    }
```

Output:- Aditya Sharma

WAP to print your name using instance variable.

```
class Main {
```

```
    static String name = "Aditya Sharma";
```

```
    public static void main(String args[]) {  
        System.out.println(name);  
    }
```
