

// Reverse number

```
class Main {
```

```
    public static void main (String  
                                args [])
```

```
{
```

```
    int n = 123;
```

```
    int s = 0;
```

```
    // reversing the number
```

```
    for (int i = n; i != 0; i = i/10) {
```

```
        int r = i % 10;
```

```
        s = s * 10 + r;
```

```
    }
```

```
    System.out.println("Reversed the  
                        number = " + s);
```

```
}
```

```
}
```

// Addition of two numbers using
