

```
class Main {
```

```
    int a = 10, b = 20;
```

```
    public static void main (String args[])  
    {
```

```
        class Main m = new Main();
```

```
        System.out.println ("Sum = " + (m.a  
                                     + m.b));
```

```
    }
```

```
}
```

// Method to add two numbers

```
class Main {
```

```
    public int sum () {
```

```
        int a = 10, b = 20;
```

```
        return a+b;
```

```
    }  
  
    public static void main (String args [])  
    {
```

```
        Main m = new Main();
```

```
        int result = m.sum();
```
